The lift truck product line remarkably comprises of 63 different models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion lift trucks. Capacities of these various vehicle models vary from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 certified facility.

Doosan Infracore America is the fastest expanding lift truck company in the North American marketplace, thanks to their stability in retaining a high level of client service quality and optimum product functioning to all Doosan Infracore Forklift users. The U.S. forklift division located in Cleveland has a expert team knowledgeable in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

In the beginning the home-based forklift market in Korea was an open import enterprise. Korea Machinery Co. Ltd. began in 1960, to import fully assembled forklifts as part of a domestic equipment expansion venture. Product sales of these products were initially targeted to state-run firms, large scale corporations, and the armed forces. This eventually led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun business operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck production plant was successfully completed. Continuous technical education grew to become the new focus for improving quality and product development.

Domestic forklift business for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's superior technological enhancements combined with sales success placed them in a position of substantial expansion of their lift truck operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative venture project to counter act competitive pressures in the US materials handling market. This project radically expanded Daewoo's lift truck sales. Construction was finished in 1984 to facilitate a contemporary plant which helped launch the business for the manufacture of high end added-value goods suitable for export. In 1993, the company had a global sales system and started exporting versions they had established through in-house technology, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into overseas markets.
